The Expert Myth Exposed!

=====

EMAIL MESSAGE BODY:

Everyone and their mother seems to think they're an expert online these days. Nothing could be further from the truth. The fact is there is only a small percentage of online marketers making the bulk of ALL the money.

It seems these so-called "experts" read a book or listen to an mp3 and all of a sudden they're THE go-to person in that field.

As if that wasn't harmful enough, they then start parading their newly learned "knowledge" on forum after forum, and before you know it you've got a wildfire of useless, harmful information being dished out by self-appointed "experts" who just don't have a clue...

\* \* \* THE REAL SECRET OF INTERNET MARKETING \* \* \*

Let me let you in on a little secret no one is telling you. Most of the information going around online is old news and outlived. 99% of the stuff you're reading on forums and through other mediums is pure garbage. And the other 1% is people selling information which is sometimes years out of date.

The fact is only a handful or two of highly successful marketers are in the know of what's going on RIGHT NOW on the internet. As you read this, they're acting on this information and raking in a TON of money.

By the time that same information gets to you, quite frankly, it's often not worth more than two pennies.

The good news is by reading this email you're going to discover exactly how to get in on that information FIRST...

\* \* \* THE SILENT MARKETING REVOLUTION \* \* \*

Imagine accessing technology that is so advance it breaks through all the barriers and delivers exactly what you need instantly. Your own private army of industrial spies delivering up to the minute undercover information others would kill to know...

The latest marketing tip that could make you thousands of dollars before it goes stale...

The most advance SEO strategies that could mean first page on Google...

The business lead system that could bring in droves of new clients...

That's exactly what Stephen Pierce's new program is doing for a few serious online marketers. Stephen has launched a revolutionary new technology that's changing the way we do business on the internet. This system is all about delivering the RIGHT information RIGHT now – when you need it most.

Think of it as getting so far ahead of your competitors that you gain inside, first access to highest quality information that will make you money.
