I told my friends that I am releasing a new report which helps almost anyone to start and run a hugely successful business.

One of my friends laughed at me saying, you could never make internet marketers work as they are always going after the latest fad.

I said, "No, there are people who need the right kind of direction and they'll succeed if properly guided ". And he laughed sarcastically and called me Dumb for trying to accomplish something which is nearly impossible..

Can You Help Me Prove Him Wrong?

I not only wanted to prove him wrong but also to help a lot of Warriors who are still burning their candles and has nothing to show for it.

Dave, your 'Confessions Of a Serial-Entrepreneur' report is priceless! To me it emphasizes everything I've learned from you up until now and I can't believe your giving it away at just \$7!!

If you want to know how to create a successful business from scratch then this is the report you MUST have. I've been coached by Dave since July and I've been applying most of what is held within this report, since then I've built up my own Self-Development business from scratch, created 2 products and I'm just about to launch my membership site which I have massive plans for! The stuff in this report works, you just need to apply it to your own situation.

I like your suggestions for product launches too - some things that even we haven't discussed yet!

My advise to any newcomer is to pick up a copy of this report. It will serve you BIG TIME in the long run (that's if you desire a long-term successful business).

Here is what you'll find in the report:

- 15 minute exercise to all the business ideas you want. You don't have to buy anything. You don't have to go out. You don't even need to have access to the internet.
- One stop check to find out if you are meant for this. Take this test and you'll be set for life. (No, it's not Dave's Money test)

- One stop check to find out if you are meant for this. Take this test and you'll be set for life. (No, it's not Brigg-Myers test)
- The four point litmus test to validate your product ideas.
- The 3 important numbers to identify the profit potential of your product.
- How to become a 'reborn entrepreneur' and the essential tools to setting yourself up for success.
- Failing to plan is planning to fail. Never make this mistake again by following the four elements of your business plan. This is the bedrock to your business and you'll be guided with simple instructions.
- The fifteen minute ritual to create your first information product.
- No list -No big names - No JV strategy to successfully launch your first product.
- The two simple ways to create rabid buyers for your products out of thin air.
- How to create one successful launch after another. No sweat, no stress money makers.

Hello Dave

Many thanks for the report. I have over the past two years purchased much more expensive programs even attended seminars where I received much less detail that what you have included in your report.

It sets out in a very detailed way what you need if you are a complete newcomer to business but it also sets out information that is critical for long term success even if you have been in business for some years.

I was a serial offline business person for many years before looking to go online and your strategies are proven long term success factors in generating cash.

Thanks Dave for setting it out so well.
